QH301
B358
v. 19

Number 1, March 26, 1965

R. Padmanabhan and KiHan Kim. Oxidation of Spermidine by a *Pseudomonas* 1
A. P. Campello, C. W. Tabor, and H. Tabor. Resolution of Spermidine Dehydrogenase from *Serratia marcescens:* Requirements for Flavin Adenine Dinucleotide and an Additional Electron Carrier .. 6
Barbara Illingworth and Carl F. Cori. Glucose-6-Phosphatase and Pyrophosphatase Activities of Homogenates of Livers from Patients with Glycogen Storage Disease 10
B. R. McAuslan. Deoxyribonuclease Activity of Normal and Poxvirus-Infected Hela Cells 15
Takashi Akazawa and Takao Murata. Adsorption of ADPG-Starch Transglucosylase by Amylose .. 21
Richard F. Squires. On the Interactions of Na^+, K^+, Mg^{++}, and ATP with the Na^+ Plus K^+ Activated ATPase from Rat Brain 27
W. Stoffel and W. Kahlke. The Transformation of Phytol into 3,7,11,15-Tetramethylhexadecanoic (Phytanic) Acid in Heredopathia Atactica Polyneuritiformis (Refsum's Syndrome) 33
E. E. Grebner and David Sidney Feingold. D-Aldohexopyranoside Dehydrogenase of *Agrobacterium tumefaciens* 37
I. Eger-Neufeldt, A. Teinzer, L. Weiss, and O. Wieland. Inhibition of Glucose-6-Phosphate Dehydrogenase by Long Chain Acyl-Coenzyme A 43
N. K. Kochetkov, E. I. Budowsky, M. F. Turchinsky, and N. A. Simukova. Method for Selective Chemical Degradation of RNA. Basic Principle 49
K. Sebesta, J. Bauerová, and Z. Sormová. Rapidly Labelled DNA in Plants 54
C. Panos, L. M. Hynes, and M. Cohen. On RNA Composition and Growth Rates of a Streptococcus and Derived Stable L-Form 62
Jeanine Gonze and D. D. Tyler. Respiratory Activity of Beef Thyroid Mitochondria 67
John E. Creange and Sidney Roberts. Studies on the Mechanism of Action of Cyclic 3', 5'-Adenosine Monophosphate on Steroid Hydroxylations in Adrenal Homogenates 73
Constantinos J. Miras, John D. Mantzos, and Gabriel M. Levis. Fatty Acid Synthesis in Human Leucocytes 79
J. Bakès, N. Befort, J. H. Weil, and J. P. Ebel. Modification of the Aminoacid Code after Bromination of Transfer RNA 84
A. Parmeggiani and E. G. Krebs. Crystallization of Rabbit Muscle Phosphofructokinase 89
C. Babinet, A. Roller, J. M. Dubert, M. N. Thang, and M. Grunberg-Manago. Metal Ions Requirement of Polynucleotide Phosphorylase 95
Arthur K. Saz and Dolores L. Lowery. Non-Penicillin-Like Cyclic Peptides as Inducers of and Substrates for *Bacillus cereus* 569 Penicillinase 102
Nobuhiko Katunuma and Mitsuko Okada. Effect of Ammonia on Decrease of Pyridine Nucleotide Levels in the Isolated Rat Liver Mitochondria 108
M. Ramuz, J. Doly, P. Mandel, and P. Chambon. A Soluble DNA-Dependent RNA Polymerase in Nuclei of Non-Dividing Animal Cells 114
Akira Asano and Arnold F. Brodie. The Properties of the Non-Phosphorylative Electron Transport Bypass Enzymes of *Mycobacterium phlei* 121
Moshe Benziman and L. Perez. The Participation of Vitamin K in Malate Oxidation by *Acetobacter xylinum* 127
Eugene C. Weinbach and Theodor von Brand. The Isolation and Composition of Dense Granules from Ca^{++}-Loaded Mitochondria 133
Halina Sierakowska, Malgorzata Zan-Kowalczewska, and D. Shugar. Colorimetric Estimation and Cytochemical Localization of Alkaline Ribonucleases with α-Naphthyl Uridine-3'-Phosphate.. 138
I. W. Chen and F. C. Charalampous. Inositol 1-Phosphate as Intermediate in the Conversion of Glucose 6-Phosphate to Inositol 144

Number 2, April 9, 1965

Lawrence M. Prescott, Robert C. Wood, and Eugene L. Speck. The Extinction Coefficient of Purified Tetrahydrofolic Acid 151
Shigezo Udaka and Tadao Horiuchi. Mutants of *Escherichia coli* Having Temperature Sensitive Regulatory Mechanism in the Formation of Arginine Biosynthetic Enzymes 156
Myron L. Bender, John V. Killheffer, Jr., and Roger W. Roeske. The Determination of the Normality of a Trypsin Solution by a Specific Titration 161
Hubert E. May, J. Lee Poyer, and Paul B. McCay. Lipid Alterations Occurring in Microsomes During the Enzymic Oxidation of TPNH 166

ROBERT JOHN EVANS. Isolation of an Amino Acid-Lipid Complex from a Proteolytic Digest of Lipovitellin 171
ROBERT P. WILLIAMS, MILLICENT E. GOLDSCHMIDT, AND CORA L. GOTT. Inhibition by Temperature of the Terminal Step in Biosynthesis of Prodigiosin 177
WALTER H. VANNESTE AND MARIE-THERESE VANNESTE. Absolute and Difference Spectra of Cytochromes$_a$ and$_{a3}$ 182
JEAN E. VORHABEN AND RICHARD H. STEELE. Copper Ion Enhancement of the Chemiluminescence (CL) Intensity Photoinducible in an Aqueous Riboflavin-Hydrogen Peroxide (HOOH) Solution. 187
R. AZERAD, R. BLEILER-HILL, AND E. LEDERER. Biosynthesis of a Vitamin K_2 by Cell-Free Extracts of *Mycobacterium phlei* 194
P. S. SARIN AND P. C. ZAMECNIK. Modification of Amino Acid Acceptance and Transfer Capacity of s-RNA in the Presence of Organic Solvents 198
MUNEHIKO YUKIOKA, YUSO TSUKAMOTO, YOSHITAKA SAITO, TAKITARO TSUJI, SHUZO OTANI, AND SHOHEI OTANI. Biosynthesis of Gramicidin S by a Cell-Free System of *Bacillus brevis* 204
HORACIO TIGIER AND SANTIAGO GRISOLIA. Induction of Carbamyl-P Specific Oxamate Transcarbamylase by Parabanic Acid in a Streptococcus 209
EVA M. SURANYI AND Y. AVI-DOR. Effect of Potassium and Ouabain on Swelling of Rat Liver Mitochondria 215
CARL W. VERMEULEN AND K. C. ATWOOD. The Proportion of DNA Complementary to Ribosomal RNA in *Drosophila melanogaster* 221
MARTIN J. KRONMAN, ROBERT BLUM, AND LEO G. HOLMES. Estimation of Helicity of Proteins from Optical Rotation Dispersion Measurements 227
M. D. HENNINGER. Hydrogenase in Chlorella: Qualitative Differences in Quinone Composition 233
J. KETTMAN. Some Energy Linked Reactions in the Keilin-Hartree Heart Muscle Preparation 237
P. A. CHARLWOOD. New Possibilities in the Design of Ultracentrifugal Equilibrium Experiments 243
I. YAMAZAKI AND K. YOKOTA. Conversion of Ferrous Peroxidase into Compound III in the Presence of NADH 249
C. R. MERRIL, J. E. MOSIMANN, D. F. BRADLEY, AND M. B. SHAPIRO. Reconstruction of Protein and Nucleic Acid Sequences II. Isotomers 255
DAVID S. FEINGOLD. The Action of Amphotericin B on *Mycoplasma laidlawii* 261

Number 3, April 23, 1965

HARVEY F. LODISH AND NORTON D. ZINDER. Attachment of f2 Bacteriophage to Cellulose Nitrate Filters 269
RAGNAR RYHAGE AND BENGT SAMUELSSON. The Origin of Oxygen Incorporated during the Biosynthesis of Phostaglandin E_1 279
MURRAY DEUTSCHER. The Effect of Polynucleotides on Aminoacyl-RNA Synthetases. I. Inhibition by Synthetic Polynucleotides 283
PAUL HOCHSTEIN, JOHN LASZLO, AND DONALD MILLER. A Unique, Dicoumarol-Sensitive, Non-Phosphorylating Oxidation of DPNH and TPNH Catalyzed by Streptonigrin 289
C. RICCI, V. PALLINI, AND P. MARTELLI. Stereospecificity of the Enzymic NAD Synthesis 296
TAI-WAN KWON AND HAROLD S. OLCOTT. Augmentation of Aldolase Activity by Glyceraldehyde-3-Phosphate Dehydrogenase 300
J. M. WOOD AND R. S. WOLFE. The Formation of CH_4 from N^5-Methyltetrahydrofolate Monoglutamate by Cell-Free Extracts of *Methanobacillas omelianskii* 300
